Projects (Ideas/Entrepreneurship)

1. Product Name: PinstaBook (Launch planned for Q1 2019)

Present

Product Strategy:

- **Problem Statement:** PinstaBook - a platform for bookmarking social posts (images and videos), create stories and travelogues (Google stories was retired) and a platform for businesses to target influencers for their Ad campaigns with advanced engagement analytics.
- **Technology:** Golang, HTML5, Google Cloud Platform Cloud DataStore
- **Pricing:** Free for end-users with Ads, monthly/annual subscription for businesses to gain analytics on their marketing campaign
- **Estimated Market:** Starting with Instagram and its users, primarily targeting [Indian market](#)

Marketing Strategy:

Users: SEO to direct users from Instagram and Pinterest

Businesses: Pitching in SAP Intrapreneurship and [SAP.io](https://www.sap.io) for directly getting in touch with businesses

(If you are interested in this idea please reach out for business plan, pitch or other information)

2. Decentralized Social Networking using WiFi Direct: WiFriends

Oct 2014 – Feb 2015

Developed a Decentralized Social Networking mobile app, that uses Wi-Fi peer-to-peer API for the overlay creation and it dynamically discovers peers(friends) in proximity to exchange profile information in JSON format. The project considers security as a major aspect of concern in such ad-hoc communication and addresses it by data encryption using pre-shared key (AES 256) exchanged once via NFC. **(Secured top grade and won the Google travel grant for this project to attend Hack in the Box Security Conference, Amsterdam.)**
