Summary

Summary

Accomplished **Customer Engineer** with **12+ years of experience in Google and SAP**, specializing in architecting and delivering complex cloud and AI/ML solutions for customers. Proven expertise in bridging **presales** and delivery, **product management** and **engineering**. **Customer First** and **People First!**

Google experience: Customer Engineering

***Customer Engineer,* Google, Germany**

(Sep 2021 – Present)

CE on SAP Account: Globally top 5th Spending accounts on Google cloud, Top 2 on Compute.

Highlight AI Project: Integration SAP Learning Hub with Gemini Notebook

- Orchestrated the integration of Gemini Notebook with the SAP Learning Hub, positively impacting over 1.5 million users and securing 55,000 licenses, which generates $4.5 million in annual recurring revenue (ARR).
- Led the opportunity as a primary technical architect driving Technical Win and driving adoption together with SAP and partners.
- Multiple Live demo sessions with SAP showcasing Gemini NB integration (150+ audience), and partners such as HCL (540+ audience)

Responsibilities:

- Manage SAP's GCP consumption to meet multi-billion dollar commitments, exceeding revenue targets.
- Dedicated CE for multiple lines of businesses advising on architecture, roadmaps, and capacity forecasting.
- Led discovery calls on Anthos, Apigee, hybrid load balancing, and DNS migrations.
- Identified new opportunities by leveraging key SAP product and AI leadership contacts.
- Secured early access to private previews like VPC-SC and Zone separation.
- Cultivate relationships with strategic SAP stakeholders.

- Built a NotebookLM-based SAP contract repository for account-wide pricing and legal queries.

Impact:

- Successfully quadrupled account revenue from 2021 through 2025.
- Directing the migration of a training learning platform, representing an $8 million ARR opportunity.
- Managing SAP FinOps initiatives in coordination with strategic stakeholders from SAP's central GCID organization, overseeing a daily GCP expenditure of approximately $1 million.
- Leading efforts within SAP GCID Billing to identify and rectify billing discrepancies, while advocating for Cost Engineering feature enhancements such as Folder PAC, flex-CUDs, and autoflex. Resolved significant billing errors for the SAP account totaling more than $20 million ARR in 2025.
- Refined GCP cost optimization strategies for SAP by proactively architecting contractual implementations within pricing and billing systems.
- Spearheaded the deployment of SAP BTP on Google Cloud across an initial four geographical regions, subsequently expanded to ten, achieving competitive parity with AWS and Azure.

SAP experience: Product Management & Engineering

SAP Experience: SAP SE, Walldorf

2015 - 2021

Senior Product Manager, SAP Business Technology Platform (BTP)

- Tripled SAP BTP adoption via Cloud Identity, multi-cloud strategies (GCP, AWS, Azure), and the SAP cloud programming model.
- Led executive-level meetings for internal adoption of Identity Services across SAP SaaS solutions.
- Redesigned BTP backing services strategy using AWS, Azure, and GCP Service Brokers.
- Led GTM and enablement, securing over 1M EUR in deals and rolling out strategic content.
- Delivered technical demos to C-suite executives at SAP TechEd and in MOOCs for 15,000+ students.
- Consistently awarded SAP Catalyst (top 5%) from 2018-2020.

Software Engineer & Student researcher, SAP BTP

- Built a Central Metering Hub for 100+ services, enabling automated pay-per-use billing via SAP HANA.
- Integrated SAP Analytics Cloud with HANA and implemented predictive autoscaling for Cloud Foundry.
- Awarded 3rd place in the 2016 Grace Hopper ACM student research competition.

Deloitte, Bangalore, India 2011 – 2013

Business Technology Analyst

- Developed custom SAP Business Suite solutions for Fortune 500 clients across industries, covering core ERP modules including FICO, MM, SD, HR, and BP.
- Built ABAP enhancements to manage large-scale master and transaction data.
